Projects

#1 https://startbooking.uz
This project was done during an internship in Navoi. Help of this website, you can get acquainted with the hotels that are present in Uzbekistan. And then you can book them and pay through our website without leaving home.
In this project, I used a module architecture, the code is written in 13 Next JS with Typescript, for state React Xooks, for Tailwind CSS style, the project is fully responsive and multi-lingual.

#2 https://crown-clothing-wb.netlify.app
This project was done while studying in Udemy.com .
The app is similar to an online store, but it's a little small. You can register with email/password or googleSign and choose any product you like.
In this project, I used a simple architecture, the code is written in React JS with Typescript, for state React Xooks and React Redux, for asynchronous Redux Saga requests, for Styled-components, the project is completely responsive.

#3 https://olmo.netlify.app
This project is made to improve layout skills.
In this project, I used a simple architecture, the code is written in React JS, for the Material UI style, the project is completely responsive.
